10 item(s) are priced from allowances rather than supplier quotations and may change.

This estimate is incomplete

4 item(s) are not yet priced or measured and are excluded from the total. A firm quotation will follow once these are resolved.

Basis of this estimate

- This is a preliminary estimate prepared from a concept design. It is not a contract or a fixed-price quotation.
- Quantities are calculated from the concept drawing. Dimensions marked as estimates will be confirmed by site measurement before a final price is given.
- Retaining walls, structural elements and drainage connections are subject to engineering design and approvals where required. Engineering, certification, council and survey fees are excluded unless listed.
- Excludes rock excavation, unknown underground services, contaminated material, and making good beyond the work area, unless listed.
- Supplier prices and availability can change. Materials are subject to supplier confirmation at the time of order.
- Residential building work over $5,000 (inc GST) in NSW requires a written contract; work over $20,000 requires Home Building Compensation cover before work starts.
